Finance, Risk Management & Corporate Governance

course code: F2029 From: 31 March - 4 April 2025 Venue: Baku (Azerbaijan) - course Fees: 4500 Euro

The Course

This course offers insights into the world of corporate finance, risk, and governance. Capital markets are central to the globalization phenomenon and essential for a well-functioning society. Because of this centrality and essential nature to societies, focus and attention must be paid to their proper functioning and oversight. To that end, this course offers an overview of the interaction between management and all other stakeholders. Diverse and complex stakeholder demands are best met by an efficient allocation of resources over an extended period of time.

By combining techniques analysis, problems and examples with real case studies the course provides delegates with key finance terminology and practice. This course not only presents the key financial tools generally used, but also explains the broader context of how and where they are applied to obtain meaningful answers. It provides a conceptual backdrop both for the financial/economic dimensions of strategic business management and for understanding the nature of financial statements, analyzing data, planning and controlling.

The course is targeted at providing a university-quality 'MBA' overview of finance, risk management, and corporate governance. Participants are expected to be high-potential learners seeking the next level of learning. Additional bibliographies, readings, and spreadsheets will be provided as takeaways.

The Goals

This course will help you learn how to:

- Specify the exact nature and scope of corporate financial reporting
- Identify and criticize specific concepts, rules, and procedures are in place for corporate financial reporting
- How & why Working Capital is critical in today's world
- What Working Capital options must be managed & how to do so
- How & why Capital Structure can make or break a firm
- What decisions must be made to properly decide on optimal Capital Structure
- How & why Capital Budgeting can go so wrong if not performed properly
- Capital Budgeting should usually add value to the firm
- Identify and overcome limitations that are inherent in corporate financial reporting and/or corporate governance
- Risk as a positive in analysis & decision making

The Process

This workshop will be highly participatory and your seminar leader will present, guide and facilitate learning, using a range of methods including discussions, case studies and exercises. Where appropriate, these will include real issues brought to the workshop by delegates.

Lessons learned from the seminar will be applied to your own organization. Key performance indicators (KPIs) for the critical success factors (CSFs) will focus attention on high priority action

plans for taking back to your organization.

The Benefits

Attendees will gain by participation in this program as a result of:

- Increased skill set in all phases of finance//governance
- Greater ability to participate in and to lead the finance/governance process
- Recognizing the increased professionalism to deal with the current and future topics
- Increased recognition by the organization of their learning and professional commitment
- Challenging themselves in an immersive learning environment

The Results

The organization will benefit by:

- Improved appreciation for the finance/ /governance approach
- Better integration of business plans and strategic intent
- Reduced inter-functional territorial battles
- Improvements in communications between staff and line management
- Higher productivity during the decision making process

The Core Competencies

Attendees will gain in the following competencies as a result of the program:

- Using financial information for guiding decisions
- Clarifying KPIs across different functions
- Building strategic thinking and implementation orientation into their professional lives
- Challenging the status quo of finance/governance, risk management, and decision making
- Recognizing the value of external standards, governance requirements, and measurements of qualitative elements
- Identifying Value Creation principles as the driving force for decision making
