Accounting: Information for Planning, Decision Making and Control

course code: F2046 From: 18 November - 6 December 2024 Venue: Singapore - course Fees: 8250 Euro

The Course

Managerial accounting is an activity that provides financial and nonfinancial information to business managers and other internal decision makers of an organization. This course examines how managerial accounting information is gathered, and how it is used by business professionals to make effective plans & decisions. Lessons such as fundamentals of managerial accounting, cost accounting concept, and managerial accounting approaches will provide you with the concepts, procedures, and analytical skills you'll need to make informed decisions in today's challenging business world.

Managerial accounting is not as widely used as other forms of accounting, nor is it as known. While companies concern themselves with financial accounting methods like audits, budgets and financial statements, they often completely ignore the forward-thinking methods of managerial accounting.

Key points include:

- Managerial vs. financial accounting
- Cost-Volume-Profit analysis for decision making
- Make vs. buy decisions for planning
- Fixed vs. variable vs. mixed costs for control
- Capital budgeting that makes a difference

The Goals

This course will help you learn how to:

- Cost terms and Concepts
- Cost Behavior: Analysis and Use
- Direct vs. Absorption Costing
- Overhead Costing for Planning and Control
- Standard Costs & Variance Analysis
- Relevant Costs for Decision Making
- Financial Statement Analysis

The Process

This workshop will be highly interactive & participatory. Your seminar leader will present, guide and facilitate learning, using a range of methods including discussions, case studies, real world examples and exercises. Where appropriate, these will include real issues brought to the workshop by delegates. Lessons learned from the seminar will be applied to your own organization.

The Benefits

- The improved appreciation for the accounting approach to planning
- Reduced inter-functional territorial battles
- Higher productivity during the decision making process

- Increased skill set in all phases of accounting
- Greater ability to use managerial accounting information to control positive outcomes

The Results

By successfully completing this course, delegates will be able to:

- Define managerial accounting & its impact on the organization
- Make better decisions through the results calculated
- Maintain better control of all costs
- Plan more accurately using managerial accounting
- Describe policies and company components that affect managerial accounting

The Core Competencies

Delegates will gain in the following competencies as a result of the program:

- Using financial information for guiding decisions
- Understand how to optimize decisions through make vs. buy analysis
- Be able to develop & critique plans that create results
- Control variances to industry standards
- Become comfortable conversing on accounting subjects
