course code: O9270 From: 13 - 24 October 2024 Venue: Kuala Lumpur (Malaysia) - Royale chulan hotel course Fees: 4500 Euro

Program Content

This program presents to you the whole skill set required to put in place and manage Preventive Maintenance in your facilities.

This program treats the topic of preventive maintenance as a multidiscipline problem - looking at the needs from the Maintenance, Production, Engineering, Management, Legal, Audit and Environment viewpoints.

This program looks at the Good and Best Practices for Preventive Maintenance: Technical, Planning and Management Processes.

At the end of the program the participant will prepare an action plan to implement an effective Preventive Maintenance System in his organization.
