Munich (Germany)

# Best Practices for Maintenance Data Collection, Knowledge Management & Maintenance Planning

course code: E9106 From: 14 - 25 October 2024 Venue: Munich (Germany) - course Fees: 4500 Euro

## Program Overview

In this program you will learn about...

This program is focused to helping you develop a Maintenance Knowledge Management System for your Organization which is then used as a basis for Maintenance Planning.

It covers issues related to collection of maintenance data in a form suitable for use in a System of Maintenance based on Facts.

The term Data is used in the widest term and includes: Equipment History, Maintenance Records, Maintenance Procedures, Customer Real Needs, New Developments, Cost Data and other Future Actionable Data.

This program's recommendations are compatible with any CMMS you might be currently using. This program is relevant to both Routine Maintenance and Plant Shutdown Maintenance.
