

IOSH Managing Safety

18 August - 5 September

Cairo (Egypt)

IOSH Managing Safely

course code: C8197 From: 18 August - 5 September 2024 Venue: Cairo (Egypt) - InterContinental Cairo Semiram course
Fees: 3750 Euro

The Conference

Safety is not the prerogative of the safety specialist but also one of the component parts in every management discipline. An office manager is no less responsible for the safety of his team than the construction manager. The law and company policy applies equally to both. The course will not turn delegates into safety experts but it will give them the appreciation of what safety issues are about and the methods available to them to ensure that safety is implemented in their own workplaces. It is after all a manager's responsibility to have a workplace free of danger and a workforce free of ill health and accidents. Managers will be able to review their own departmental systems for safety, introducing new controls or implementing changes as appropriate to ensure safety in the workplace.

Upon successful completion of the course delegates should be able to:

- Implement workplace precaution hierarchies
- Identify data and techniques required to produce an adequate record of an incident
- Prepare and use active monitoring checklists
- Explain the component parts of a recognised Safety Management System
- Implement environmentally friendly systems

The Goals

- Understanding, assessing and controlling risks
- Understanding responsibilities
- Investigating accidents and incidents
- Measuring performance
- Protecting the environment

The Process

The course is presented with superb power point and animated graphic presentations. Quizzes, board games and DVDs keep the delegates active and fully involved, on the ball and never bored. It is a practical program with easy guidance and a sharp business aim. Delegates will be enthusiastic and involved and ready to go back to implement the methods learnt on going back to work.

The Benefits

Participants will gain:

- Confidence in having attended a certified course
- Recognise the best current practices
- Appreciation of environment issues
- Understanding of Safety Management
- Knowledge of risk evaluation that will better prepare them to anticipate different contingencies

The Results

The company that sends personnel to this seminar will gain in that the delegates:

- Will acquire an internationally recognised certificate
- Understand the basics of both safety and environment
- Appreciate their own responsibilities within the law
- Become better-motivated that will result in cost savings
- Develop different approaches to increase organisational effectiveness and efficiency

The Core Competencies

- The legal basis of safety
- Safety Management Systems
- Active monitoring & Reactive Monitoring
- Risk assessment and risk control
- Environmental awareness

The Conference Content

Introduction and Assessing Risks

- Introduction
- Course Overview
