## The Conference

Whether starting a business, growing a business or preparing for retirement, the probability of accomplishing your goal increases substantially when you plan it rather than just start doing it. Planning is even more critical during challenging economic times or when multiple people and groups need to coordinate their actions to accomplish the primary goals, as is true of almost all organizational goals.

In today's challenging economic world, organizational planning has become even more critical, not only to survive but to thrive. Most business executives will agree, intellectually, with the preceding statement, but agreement is not enough.
