

Category Management in Procurement

10 - 21 February 2025

Boston (USA)

Category Management in Procurement

course code: M1017 From: 10 - 21 February 2025 Venue: Boston (USA) - course Fees: 8250 Euro

The Course

This new approach maximizes value from procurement by combining traditional techniques, with newer tools, techniques and approaches. We will give an understanding of the Category Management methodology with the necessary working knowledge of how this approach can be used, and is now being used, by World Class companies.

This seminar shows how Category Management maximises value from procurement by integrating supplier sourcing, supplier management, supplier development and supplier relationships management.

Effective Category Management of procurement and the supply chain can create economic profit for World Class supply chains; we will also demonstrate how this can be achieved.

The Goals

- Apply a thorough understanding of supply chain activities
- Identify, analyse and evaluate procurement opportunities
- Understand the keys aspects in category management
- Use tools and techniques
- Make procurement and supply chain organisational improvements

The Process

- Discussion and lectures using international best practice
- Practical applications
- Case studies
- Extensive course manual
- Visual media
- Presented by the author of many books on supply chain and procurement topics

The Benefits

- Understanding the role procurement in the total supply chain
- Understand what drives your other supply chain players
- Use analytical tools to identify procurement opportunities
- Make cost and service improvements
- Gain a framework for continual improvement
- Use best in class practices like economic profit

The Results

- Understand the current procurement and supply chains activities
- Access these for value opportunities
- Examine how to maximize value from procurement
- Apply appropriate tools

- Make continual improvements

The Core Competencies
