Workforce Planning and Recruitment

course code: H3015 From: 17 March 2025 - 2025 March 21 Venue: Baku (Azerbaijan) - course Fees: 4500 Euro

Introduction

This unique course provides participants with all they need to know about the new manpower planning cycle –now called Human Resource Planning (HRP). This has become the fastest growing and most dynamic area in today’s Human Resources Departments. In some organisations its value is fully recognised and it become a department in its own right. The new manpower planning requires a complete set of new skills, tools and software. This advanced program will show you what needed and what results can be achieved.

- Find out about the software needed for predictive manpower planning
- Master the way to do organisational charts, and manager/ supervisor ratios
- New approach used on this programme will provide a very high ROI on your investment
- Benefit from manpower utilisation research completed in 2010

Objectives

Delegates attending this program will be able to:

- Use the new linear strategic model works for manpower planning
- Calculate and produce convincing results from manpower data including predictive trends
- How each segment of the manpower model works, data collection, analysis and succession planning
- Design and master the ability to construct organisational charts and ratios
- Know what software to use for predictive trend analysis and forecasting
- Be able to draw a business process map and understand how to do business process re engineering.

Training Methodology

All the complex issues will be simplified using practical examples and case studies. All training will be conducted in a friendly participative environment. Extensive group work, with mini presentations at all major stages of the programme. Where appropriate, video and video clips will be use to reinforce key points. Each person will be encouraged to write up their own implementation plan for action when returning to work.

Organisational Impact

- Dealing with only one area of HRM often does more harm than good, this course gives the big picture
- Personnel attending will be able to master the new techniques which will aid organisational

efficiency.

- Data management as part of manpower planning is often inadequate, those attending will be able to calculate and produce predictive information which will be of great use and measurable value to the business
- Be able to react to fast moving business changes by using the “RIGHT “ technique
- Will be able to provide up to date advise on organisational design, link employee numbers with work don and fully understand downsizing and right sizing
- Will have knowledge of the immense value that the organisation can benefit from using the latest formulas, software and predictive tools

Personal Impact

- There will be new things and approaches that will stimulate you and give you a great professional advantage
- Learning the new models will be facilitated through numerous case studies and practical group work – aiding you learning experience.
- Human Resource Management is rapidly becoming an essential element of HR departments –its new; the processes are new and this course will insure you can master the techniques and be ready for the new HR.
- The practical nature of this course is designed to aid your learning and enjoyment- examples throughout including mastering how to do correlations and what data to use –will be simplified through many practical worked examples.
- We would consider this course to be essential for any person wishing to have a successful career in HR or in building or changing organisations

SEMINAR OUTLINE

DAY 1

Manpower Strategy and Organisational Analysis (Area 1)
