Advanced Developing Field Leaders in Industrial Security

13 - 24 January 2025

Geneva (Switzerland)

Advanced Developing Field Leaders in Industrial Security

course code: M1163 From: 13 - 24 January 2025 Venue: Geneva (Switzerland) - course Fees: 6750 Euro

Description:

This curriculum provides students with an introduction to the Industrial Security Program as well as a thorough understanding of the DoD and National Industrial Security Program (NISP) rules, procedures and requirements. The curriculum also provides an in-depth review of the Certification and Accreditation (C&A) process. Upon completion of this curriculum the students should have the knowledge to implement the basic industrial security requirements of the National Industrial Security Program Operating Manual (NISPOM). These are the same requirements that every cleared contractor facility participating in the National Industrial Security Program (NISP) follows and on which any additional security requirements imposed by the government should be based. Upon completion of all courses in the curriculum and the passing of the individual course exams students will be issued a Basic Industrial Security for the Government Security Specialist eLearning Certificate. Industrial Security Program. The course presents the legal and regulatory basis for the program and how the program is implemented throughout DoD. This course includes an overview of DoD implementation of the National Industrial Security Program (NISP) and discussion of including in contracts security requirements that are outside the scope of NISP.
